What is the relationship between 'kontakt\_stamm\_verbaende\_art\_id' and 'verbaende\_art\_id'?  
Which is returned from the popup form and which is saved in your \$fieldarray?  
Which do you NOT want stored in your \$fieldarray?

If you want the value for 'verbaende\_art\_id' stored as 'kontakt\_stamm\_verbaende\_art\_id' and not 'verbaende\_art\_id' then you must remove it from \$select\_array before you exist from  
\_cm\_popupReturn().
