I can now generate the records which I want to insert. Everything works fine so far. But if I select some records and want to insert them in the child database I get the following error message:

```
Fatal Error: Uncaught exception from Error, message = Call to a member function
array_update_associative() on null, code=0, file=C:\xampp\htdocs\radicore\includes\std.add5.inc,
line=140, file = C:\xampp\htdocs\radicore\htm\training_plan_anwesenheit(add5) .php
line = 22
function = require
(# 256)
```

Error in line 463 of file 'C:\xampp\htdocs\radicore\includes\error.inc'.

PHP\_SELF: /radicore/htm/training\_plan\_anwesenheit(add5).php

What did I forget in my code or what did I wrong?
