I use Times for the column headings.

Here is the pdf.styles.inc entry:

```
$style['hdg_anwesenheit']['font'] = array('family' => 'Times',      // Courier, Helvetica, Times
                        'style' => '',          // blank=Regular, B=Bold, I=Italic, U=Underline
                        'size' => 9,            // size in points
                        'height' => 3.9,            // line height in units
                        'draw' => .3,           // width of drawn lines
                        'overflow' => y,        // overflow
                        'border' => '1',        // position of border lines
                        'halign' => 'left');    // horizontal text alignment (left, right, center)
```
