I could download the zip file and replaced the files. The result is the same.

But now I cannot access the radicore application anymore. I get the following error message:

Fatal Error: No value has been defined for 'https_server' (# 256)
Error in line 1346 of file '/var/www/vhosts/mgh-saar.de/includes/include.session.inc'.

Do I have to change something in config.inc?

My local application in xampp works fine.
