Hi Tony,
I have a new problem concerning this topic. I have two tables. One which stores all the teams for each season and one that stores the team members of these teams. Now I want to insert team members for a new season with this construction.
In the _cm_initialise() method of the team member table class I have the first problem, because I have to change $where to '' to get all possible teams from the popup1 form of the team table. I think that this is the reason why I have additional problems and why the code which you provided in FAQ79 doesn't work in this case.
When selecting one or more teams, I get the team members for this team shown in the popup2 form. (I cannot change the $settings['select_one'] = TRUE for the (popup1) team table. Even if I try this in the _cm_popupCall() method.)
I thought that I could see the selected team members in the _cm_popupReturn() method and I thought that I could insert them via an add4 pattern? I hope this will work. I am not at this point so I haven't tried it yet.
In the popup2 form I have this time only the choose button. The choose null button isn't displayed.
I attachded my code of the _cm_initialise() method. Can you tell me what is wrong with it?

```
   function _cm_initialise ($where, &$selection, $search)
   // perform any initialisation for the current task.
   {
      // wenn htm_orga_mannschaften_kontakte(popup2) aufgerufen wird, werden alle
verfÃ¼gbaren Mannschaften angezeigt
      switch ($GLOBALS['task_id']) {
         case 'htm_orga_mannschaften_kontakte(popup2)':
            if ($GLOBALS['return_from'] == '') {
               $where = '';
               $pattern_id = getPatternId();
               if (strtolower($pattern_id) == 'popup2') {
                  // request_id has not been supplied yet, so get it now via a popup
                  $this->scriptNext('htm_orga_mannschaften(popup1)');
               } // if
            }
            else {
               if (empty($selection)) {
                  if (isset($GLOBALS['return_from'])) {
                     if ($GLOBALS['return_from'] == 'htm_orga_mannschaften(popup1)') {
                        // nothing selected from popup screen
                        $this->scriptPrevious($GLOBALS['errors']);
                     } // if
                  } // if
               } // if
            } // else
      }; // switch ($GLOBALS['task_id'])
```

```
        return $where;

    } // _cm_initialise
```
