This is the value of $subdir.DIRECTORY_SEPARATOR.$_GET['select'] in xampp:

C:\xampp\htdocs\radicore\includes\std.filepicker1.inc:121:st ring
'pictures/training_uebungen\000006_HTM001000003a.jpg' (length=51)

In line 133 you replace the '\' with '/'. Could this be the problem here, too?

The error message on my linux host is:

Fatal Error: Method 'getDir' does not exist in standard object (# 256)
Error in line 12066 of file '/var/www/vhosts/mgh-saar.de/includes/std.table.class.inc'.
PHP_SELF: /htmanager/htm/orga_tests_grafik_02(filepicker).php
CURRENT DIRECTORY: /var/www/vhosts/mgh-saar.de/htmanager.de/htmanager/htm
REQUEST_URI: /htmanager/htm/orga_tests_grafik_02(filepicker).php?session_
name=menu3&select=000006_HTM001000007.JPG

Inserting from the same directory works fine with an other task.
