Thank you for applying the new std.table.class.inc. Could it be that the include.session.inc has to be updated too?

I get the following error message:
Fatal Error: Uncaught exception from Error, message = Call to undefined function array2string(), code=0, file=C:\xampp\htdocs\radicore\includes\std.table.class.inc, line=5855, file = C:\xampp\htdocs\radicore\includes\include.session.inc
line = 212
function = popupCall
class = Default_Table
