Thank you for applying the new std.table.class.inc. Could it be that the include.session.inc has to be updated too?

I get the following error message:

```
Fatal Error: Uncaught exception from Error, message = Call to undefined function array2string(),  
code=0, file=C:\xampp\htdocs\radicore\includes\std.table.class.inc, line=5855, file =  
C:\xampp\htdocs\radicore\includes\include.session.inc  
line = 212  
function = popupCall  
class = Default_Table
```
