Subject: Re: Filepicker - getDir()
Posted by htManager on Mon, 30 Mar 2020 14:48:16 GMT

Tony, I don't know what it is wrong with my application. I initialized the picker directories in the same way you did in the prototype applications. But it fails.
I looked in xample and in survey and in both application the icons are not correct shown in the picker screen and you can't them choose. See attached file.
I changed the include directory to that from version 2.13.0 and everything works fine. Can it be that there is a problem with the new version 2.14.0?
