In V 2.13.0 the $select_array returns: string 'pictures/training_uebungen/000006_HTM001000002b.JPG' where pictures/training_uebungen/ is the value of $this->picker_subdir, initialised in _cm_initialiseFilePicker(). The icons in filepicker screen are shown correctly.

In V 2.14.0 the $select_array returns: string 'C:/xampp/htdocs/radicore/htm/pictures/training_uebungen/000 006_HTM001000009.JPG'. The icons in filepicker screen aren't shown correctly.
