In V 2.13.0 the \$select\_array returns: string  
'pictures/training\_uebungen/000006\_HTM001000002b.JPG' where pictures/training\_uebungen/ is  
the value of \$this->picker\_subdir, initialised in \_cm\_initialiseFilePicker(). The icons in filepicker  
screen are shown correctly.

In V 2.14.0 the \$select\_array returns: string  
'C:/xampp/htdocs/radicore/htm/pictures/training\_uebungen/000 006\_HTM001000009.JPG'. The  
icons in filepicker screen aren't shown correctly.
