I've configured radcore with the following setting. I am a window user.

PHP 5 and above and Apache version 2.4

1 => Include path in htaccess file. My xampp is installed on D drive
php_value include_path ".;D:\xampp\htdocs\radcore\includes"

2=> changing in php ini file. The include path in htaccess and php ini files must be the same.
include_path = ".;D:\xampp\htdocs\radcore\includes"

3=> changing in httpd.conf file
<Files "htaccess.txt">
 Require all denied
</Files>

and

```
<Directory "D:/Apache2/htdocs">  
    AllowOverride All  
    Require all granted  
</Directory>
```

Also uncomment xsl extension in php ini file.
