Yes, I know and it works fine. But what I mean is, if it is possible to create a structure with more than one 'node' table? I attached a screen shot where you can see the organisation hierarchy. These occurrences are all stored in one table. Now I have additional tables for the teams and for the team members. And my question is, if these two additional tables can be shown in the tree structure?

The screenshot shows a web application interface for a handball federation structure. At the top, there is a title bar 'Verbandsstruktur' and several navigation buttons: 'Neu', 'Suchen', 'Letzte Suche', 'Altersklassen (Vorgaben)', 'Ebenen', 'Nationen', and 'Ver'. Below this, there are selection controls: 'Selections: [select all](#) | [unselect all](#) | locked '. A second row of buttons includes 'Detail', 'Ändern', 'Löschen', 'Audit Trail', 'Hallen', 'Schulen', and 'Vereine'. The main content is a tree view with a 'Select' column on the left and a 'Verband' column on the right. The tree starts with 'IHF International Handball Federation', which is expanded to show 'European Handball Federation'. Under 'European Handball Federation', there are 11 national federations, each with a checkbox and a small flag icon. The 'Rukometni Savez Bosne I Hercegovine' entry is highlighted in yellow. Below the national federations, the 'Deutscher Handballbund' is expanded to show 11 regional federations, each with a checkbox and a small logo icon.

Select	Verband
<input type="checkbox"/>	IHF International Handball Federation
<input type="checkbox"/>	European Handball Federation
<input type="checkbox"/>	Albanien - federata shqiptare e hendbollit
