Yes, I know and it works fine. But what I mean is, if it is possible to create a structure with more than one 'node' table? I attached a screen shot where you can see the organisation hierarchy. These occurrences are all stored in one table. Now I have additional tables for the teams and for the team members. And my question is, if these two additional tables can be shown in the tree structure?

The screenshot shows a web application interface for a handball federation structure. At the top, there is a title bar 'Verbandsstruktur' and a navigation bar with buttons: 'Neu', 'Suchen', 'Letzte Suche', 'Altersklassen (Vorgaben)', 'Ebenen', 'Nationen', and 'Ver'. Below this is a 'Selections' section with links for 'select all', 'unselect all', and a 'locked' checkbox which is checked. Another row of buttons includes 'Detail', 'Ändern', 'Löschen', 'Audit Trail', 'Hallen', 'Schulen', and 'Vereine'. The main content is a tree view with a 'Select' column on the left and a 'Verband' column on the right. The tree starts with 'IHF International Handball Federation' and branches into 'European Handball Federation' and 'Deutscher Handballbund'. Under 'European Handball Federation', there are 11 national federations, with 'Rukometni Savez Bosne I Hercegovine' highlighted in yellow. Under 'Deutscher Handballbund', there are 10 regional federations.

Select	Verband
