The table has a primary key. Here you can see what's in the <table>.dict.inc file:

```
// primary key details
$this->primary_key      = array('pool_user_id',
                                'pool_user_seq_no',
                                'pool_rdcaccount_id');
```
