Yes, I know. I thought that if I set NULL as default in the table structure, this would be made automatically. I attached a picture of my table structure.

If I execute "INSERT INTO test_datum SET `id`='4', `test_datum`=NULL" instead of "INSERT INTO test_datum SET `id`='4', `test_datum`="" the record will be inserted correctly without "0000-00-00".

Is there a setting to handle a blank value "explecitly as NULL?
