Sorry, the original file mnu\_task.class.inc was in the original version. I obviously searched for a wrong file name.

I copied the new file in menu/classes and now the next error appears. When I want to delete a navigation parent.

Fatal Error: Unable to locate '.dict.inc' file for table 'mnu\_task' (# 256)

Error in line 7000 of file 'C:\xampp\htdocs\radcore\includes\std.table.class.inc'.

PHP\_SELF: /radcore/menu/mnu\_nav\_button(list2)a.php

CURRENT DIRECTORY: C:\xampp\htdocs\radcore\menu

I exported all the tables in the menu database to php but without success.
