I have managed to replicate this issue and found the offending code. In file `std.table.class.inc` you will see lines 6890 and 6891 as follows:

```
} elseif (empty($insertarray[$field]) AND !empty($spec['default'])) {  
    $insertarray[$field] = $spec['default'];
```

If you either remove these lines or comment them out your problem should disappear.
