Hi Tony,

is it possible to generate PDF output with lines where the start and end of the line are determined by x/y coordinates?

I know that in the *.report.inc file the array('text' => "", 'style' => 'rule_title', 'width' => '25%'); draws a horizontal line.

But I haven't read anywhere whether such a line can be issued.

I have attached a picture.

if this is not possible, do you have any idea how I could make this happen?
