Instead of drawing lines I would have another solution:  
To do this I would have to put a field over an image. However, the field is displayed either above or below the image. Depending on how I fill out the structure file.  
\$structure['multi10']['fields']['1'] ...  
\$structure['multi10']['fields']['2'] ...

Is it possible to layer one on top of the other?  
I have attached a drawing.
