Subject: Re: User configuration in a VPD
Posted by htManager on Mon, 14 Apr 2025 18:31:37 GMT

Yes, I am aware of the implementation of VPD and it works very well.
But as far as I can see, the mnu_role table does not have a rdcaccount_id column and surely this shows all available roles?
However, I would like only two roles to be selectable when a new user is created by an "account admin". Is that possible?
