
Subject: Audit_trn task_id field too small

Posted by [johandewit](#) on Tue, 20 Jun 2006 07:28:20 GMT

[View Forum Message](#) <> [Reply to Message](#)

In audit_trn, task_id = varchar(32)

In the menu database, task_id = varchar(40)

When task_id length > 32, this gives a validation error

task_id[0]:field cannot exceed 32 characters

Solution

Change table definition audit_trn.task_id(varchar(40))

This is still in version 1.90

Greetings
