hi

i'm new in the radicore

i follow the topic installations
but i still have probles whit the logon part

this is the error

Warning: require(include.general.inc) [function.require]: failed to open stream: No such file or directory in D:\xampp\xampp\htdocs\radicore\menu\logon.php on line 18

Fatal error: require() [function.require]: Failed opening required 'include.general.inc' (include_path='.;D:\xampp\xampp\php\pear\') in D:\xampp\xampp\htdocs\radicore\menu\logon.php on line 18

i think the problem is in the htaccess.txt file

but y dont now
please help me

atte
david

That message means that you have not set up your htaccess file correctly. Please read the installation instructions at http://www.radicore.org/installation.php and follow them to the letter.

this is my

htaccess.txt

```
<Files ~ "\.inc$">
  Order deny,allow
  Deny from all
</Files>

php_value default_charset "UTF-8"
php_value include_path".;
D:\xampp\xampp\htdocs\radicore\menu;
D:\xampp\xampp\htdocs\radicore\audit;
D:\xampp\xampp\htdocs\radicore\workflow;
D:\xampp\xampp\includes;"

php_value register_globals 0
php_value magic_quotes_gpc 0
php_value session.use_cookies 1
php_value session.use_only_cookies 0
php_value session.use_trans_sid 1
php_value session.gc_maxlifetime 3600
php_value arg_separator.output "&amp;"
php_value url_rewriter.tags "a=href,area=href,frame=src,input=src,fieldset="
```

i dont know what is the problem

If you run phpinfo() you will see the actual include_path that is being used instead of the path that you *think* is being used.

The include_path reported in that error message is not the same as the one in your htaccess file, so your htaccess file is wrong. It looks like you have a carriage return after each semi-colon, which is an invalid character. That entry should be on one unbroken line.
