I upgraded to 1.91.0 and I can't login anymore. The following error appears when I try to login:

Fatal Error: MySQL: Unknown column 'language_code' in 'field list' (# 1054)

SQL query: SELECT SQL_CALC_FOUND_ROWS mnu_user.user_id, user_name, start_date, end_date, is_disabled, pswd_count, pswd_chg_date, language_code, email_addr, rdcaccount_id, external_id, party_id, user_timezone, mnu_user_role.role_id, mnu_role.start_task_id , CASE WHEN (SELECT count(ip_address) FROM mnu_user_ip_address WHERE user_id='JH') = 0 THEN true WHEN (SELECT count(ip_address) FROM mnu_user_ip_address WHERE user_id='JH' AND ip_address='::1') = 1 THEN true ELSE false END AS ip_address_valid, (SELECT GROUP_CONCAT(role_id ORDER BY role_id SEPARATOR ',') FROM mnu_user_role WHERE user_id=mnu_user.user_id) AS role_list, mnu_language.input_date_format, mnu_language.output_date_format FROM mnu_user LEFT JOIN mnu_user_role ON (mnu_user_role.user_id=mnu_user.user_id AND mnu_user_role.is_primary='Y') LEFT JOIN mnu_role ON (mnu_role.role_id=mnu_user_role.role_id) LEFT JOIN mnu_language ON (mnu_language.language_id=COALESCE(mnu_user.language_code, 'en')) WHERE mnu_user.user_id='JH' AND user_password='HfTh<=8/62#FQ*mt' ORDER BY mnu_user.user_name asc LOCK IN SHARE MODE

Error in line 601 of file 'C:\xampp\htdocs\htm\radicore\includes\dml.mysqli.class.inc' .

Host Info: localhost via TCP/IP

REMOTE_ADDR: ::1
REQUEST_URI: /radicore/menu/logon.php

I checked the tables mnu_language, mnu_user and mnu_user_alt and also the *.dict.inc files. They all had the column language_id.

I also copied all the new files in the dict, include and menu directory. Which files did I forget to copy?

It looks like you failed to copy across the new version of 'logon.class.inc'. If you look at line 142 you should see where it refers to 'language_id' instead of 'language_code'.

I copied the new logon.class.inc file from 1.91.0 in the menu directory. But in this file there are three locations where language_code is written. Is this still the old version of logon.class.inc?

You must be looking in the wrong file. The version of 'logon.class.inc' which is in radicore-2015-10-01.zip contains references to 'language_id' and zero references to 'language_code'.

Yes, you're right. Obviously something went wrong with unzipping the 1.91.0 file. Everything works fine now again. Thank you.
