Subject: Task, Role - Field Access functionality not working

Tried to List, Add fields by clicking those buttons under Task(Proc) and Role. At first, it seemed like this functionality is not working.

Issue # 1
I checked on READONLY role in List Role, would be good to have a search functionality fo a specific Task. Reason being users will need to navigate the page arrow buttons. Imagine if there were 671 objects. At first I thought it was a bug... Its just the user friendliness.

Issue # 2
Would be good to have a search functionality in "Maintain Field Access via Task" for seaching ROles. Not unusual to have a lot of roles.

Issue # 3
Here is a bug:
1. I did a search for %Role%
2. Checked on mnu_role(list)
3. Click on List Fields
4. It says Nothing retrieved from database table MNU_TASK

Then I removed my search parameter from Search form and navigate to that Task using the page navigator. That works.

Issue #1 and 2: Good idea. I will see if I can include it in the next release.

Issue #3: I have been able to reproduce this, so it is a bug. I will be sending you a fix shortly.

Here is a fix for issue #3:

In file std.list2.inc change line 79 from

$selection = $dbouter->initialise($selection, $where);

to

$selection = $dbouter->initialise($selection, null);
Let me know if this causes unexpected problems elsewhere.

Here is a fix for isues #1 and #2:

In file std.multi3.inc change line 249 from

```
// get data from the middle table
$middle_data = $dbmiddle->getData($where);
```

to

```
if (isset($search)) {
    $dbmiddle->setSqlSearch($search);
} // if

// get data from the middle table
$middle_data = $dbmiddle->getData($where);
```

Then you can create navigation buttons as follows:

to task 'mnu_role_taskfield(multi)a' you can add 'mnu_role(search)'
to task 'mnu_role_taskfield(multi)b' you can add 'mnu_task(search)'
Let me know if this works OK.

Hello,

Issue #1 and #2 has a solution.

Tested #3.

Seems like Task Menu is working fine when I:
1. Select select a task and clicked on "Field Access" or "List Field" buttons
2. Did a search and perform no. 1

Thank you, and well done Tony.
