Hello dear, friends .. any one help me ! ..?

I use win 7, xampp 3.3.2, and radicare-2017-04-02

after completion of the settings (database and data for all schema) When loading the index.html file in web browser, I got this error:

This application has encountered an unrecoverable error

The following has been reported to the administrator:

2017-05-05 01:51:37

Fatal Error: mysqli_connect(): Access denied for user 'root'@'localhost' (using password: NO)

Error in line 291 of file 'C:\xampp\htdocs\radicore\includes\dml.mysql.class.inc'.

PHP_SELF: /radicare/menu/logon.php

CURRENT DIRECTORY: C:\xampp\htdocs\radicore\menu

SERVER_ADDR: ::1

SERVER_NAME: localhost

HTTP_HOST: localhost

REMOTE_ADDR: ::1

REQUEST_URI: /radicare/menu/logon.php

thanks

It's all in the error message - you are trying to access the database with a username of 'root'@'localhost' without a password, and this combination is not valid.

You need to create a username WITH a password that can be used by the application, and you need to put this into the config.inc file.

thanks for the rapid response, Mr. Tony
that is true, put a password it's a solution to the first problem
I think there is a loss of information in some of files, I got this error again:

This application has encountered an unrecoverable error

The following has been reported to the administrator:

2017-05-05 12:37:46

Fatal Error: XSL functions are not available. (# 256)

Error in line 29 of file 'C:\xampp\htdocs\radicore\includes\include.xml.php5.inc'.

PHP_SELF: /radicare/menu/logon.php

CURRENT DIRECTORY: C:\xampp\htdocs\radicore\menu

SERVER_ADDR: ::1

SERVER_NAME: localhost

HTTP_HOST: localhost

REMOTE_ADDR: ::1

REQUEST_URI: /radicare/menu/logon.php

can you help me please? ..Thanks

Have you loaded the XSL extension into PHP?

Thanks Mr Tony ...

Are there other libraries should be allowed to work with all its characteristics?

Perhaps a useful video

I think that: maybe a video on your site about installation and settings and customization ... its a benefit idea ...!

Try reading the installation instructions at <http://www.radicore.org/installation.php>, especially the part where it refers you to <http://www.radicore.org/radicore-for-php.php> for details on the extensions which need to be loaded.

Thank you Mr Tony, it's very useful information ...!

but You have said in the installation:

12.To run the application please point your browser to <http://localhost/radicore/index.html> and use one of the 'logon' hyperlinks. When the logon screen appears you can use the following:

User = MGR

Pswd = password (case sensitive)

it's OK, But what is the password?

Referred to the database, I found that all passwords are encoded (menu_user table)

I could only log in with one account demo/demo

I think It's a limited account

what should I do?

Have you tried 'password'? After you logon on you should change this.
