Subject: Problem with _cm_formatData in v1.27, Detail view

Hi

In Radicore 1.24, I'm changing display attributes according to http://www.tonymarston.net/php-mysql/infrastructure-faq.html #faq73 and it works fine. But when I upgrade to Radicore 1.27 only List view works. In Deatil view the data is not formated. Am I missing something?

Any tips?

Thanx
Mirsad

I cannot reproduce this problem. If you log on to the demo application and press the 'To Do' button on the home page you will see the 'List ToDo by User' screen which shows one line displayed in a different colour. If you select that line and press the 'Read' button this will show the same record in detail view, but it is still in a different colour.

I suggest you step through your code with your debugger to see what is happening.
