I'm wondering if you can reproduce this behavior for a multi3 screen: (such as "Maintain Schedule Events" for the classroom)

start with "No entries found on CRS_SCHEDULE" for the selected room/schedule.

when there are no entries and i click the "select all" hyperlink a blank row is displayed with the checkbox selected.

normally i wouldn't care about this but one of my users did this in one of my tasks then clicked on my print(pdf) button and got a "Maximum execution time exceeded" for ".../includes/tcpdf/tcpdf_php5.php on line 1542.

radicore 1.28

php 5

mysql 5

linux os

thanks

this also happens for list2 and multi2 tasks as well.

This is a bug. The attached file should fix it.
