This is happening in a mac laptop with xampp installed, when I click on 'next>' link of any list1 transaction I get this message:
Fatal error: Cannot use string offset as an array in
/Applications/xampp/xamppfiles/htdocs/radicore/includes/std. list1.inc on line 176

Line 176 is as follows:

$pagination['main']['numrows'] = $dbobject->getNumRows();

and has been used without problems for many years. It works for me using both PHP 4 and 5, so I would suggest there is a problem with the xampp distribution. I never use xampp, so I cannot reproduce this problem.
