Sir,
I tried to install radicore 10 in fedora core 5. I am getting the following error:

This application has encountered an unrecoverable error
The following has been reported to the administrator:

2006-06-30 10:31:47
Fatal Error: mysqli_connect(): Cannot connect to database 'audit'. (# 256).

SQL query: SET names 'UTF8'

Error in line 47 of file '/var/www/html/radicore/includes/dml.mysqli.class.inc'.

Script: /radicore/menu/logon.php

Remote Address: 127.0.0.1

Request URI: /radicore/menu/logon.php

I have created all database files in mysql. I am attaching the error web page also.

kindly help me.

simon

The error message means exactly what it says. You may *think* that you have created a database called "audit", but my software cannot find it. Can you view all of your databases using your administration tool? (phpMyAdmin, MySQL-Front, or MySQL Administrator).

Are you using a shared server where all database names ae prefixed with your account name?

Sir,
I dont use a shared server. I have installed it on my own PC which is stand alone. I downloaded phpmyadmin (version 2.8.1) and installed. The 'audit' database and its tables are visible using phpmyadmin. But the problem still exists with radicore.
What may be the problem? Kindly help.

Regards - simon

Sir,
radicore 10.0 is working fine now in fedora core 5. The problem was due to an error in password entry in radicore/includes/config.inc.
Kindly neglect my previous mail.

thanking you,
- Simon
