Subject: Use Messages[] in a LIST1 transaction

Tony,

I was trying to modify or supplement the message that is displayed on the screen when a LIST1 transaction returns no rows from the database. As standard message sys0089 (Nothing was found matching this profile) is displayed.

I wanted to add a message in _cm_post_getData but this doesn't seem to be picked up and displayed. Following in my debugger: std.list1.inc sets $messages to sys0089 when the return count is 0 and include.xml.php5.inc checks $messages, but anything in $this->messages[] seems to be ignored. Can't tell whether this is a bug but I don't seem to be able to get any messages to display at all in a LIST1 transaction.

Can you provide any advice?

Thanks,

Graham

Try this modified version of std.list1.inc to see if it solves your problem.

Thanks Tony, that's works perfectly now. Incidentally, the same issue occurs with the LIST2 transaction too, if you could also update that (I'll modify my copy with the same changes as per LIST1 in the meantime).

Sorry Tony, I keep opening my mouth without checking first. In fact the functionality does already work OK with the LIST2 transaction. It was only an issue with LIST1 and as mentioned earlier - this now works fine.

Regards,

Graham
