when you try to import a data base to the dictionary you get a fatal Error:

Fatal Error: dict_table(list)2 - Task 'dict_table(list)2' does not exist. (# 256).
Error in line 1683 of file '/home/wmRadicore/radicore/includes/include.session.inc'.
PHP_SELF: /dict/database(add1)import.php

there is no entry for 'dict_table(list)2' in the mnu_task table.

Whoops! I renamed that task, but forgot a reference to the old name in one of the class files.
See attached for a fix.
