Subject: Filter records based on user

Hi Tony,
I haven't looked at Radicore since 1.30ish
Is there now a way to filter records that are visible to a user based on that user?

I realize that we can just append the where statement inside of _cm_pre_getdata but I was wondering if this was added the core of the system
Cheers,
-Dave

You cannot filter by user, but you can filter by account as described in Implementing Virtual Private Databases. If you give each user his own account then it would be possible to achieve what you ask.
