Subject: Using Pipe3 to model workflow

I was very interested in how workflow is implemented in Radicore and read a bit about Petrinets etc. I downloaded the Pipe3 program to model my workflow. I can create the nets OK and save them, but I cannot open them up again - I get a java error.

I know its outside the scope of Radicore, I was just wondering if anyone else had experienced this and had solved this problem?

Thanks and regards

Graham Jones

You should report that error to the authors of that software. You can create a new issue at http://code.google.com/p/pipe-3-development/issues/list

Ta. Done.

Cheers

Gj
