Hello

I have read your instructions.

my php configuration you can find here:
http://www.augustin.it/radicore/index2.php

i have done a standard installation

i see these messages after trying to login

Warning: main(include.general.inc): failed to open stream: No such file or directory in /home/httpd/vhosts/augustin.it/httpdocs/radicore/menu/logon. php on line 19

Warning: main(include.general.inc): failed to open stream: No such file or directory in /home/httpd/vhosts/augustin.it/httpdocs/radicore/menu/logon. php on line 19

I think i shoud use the path from SERVER["DOCUMENT_ROOT"]

but that does not function.

Anny ideas?

Many thanks in advance

Erik

Your $_SERVER['DOCUMENT_ROOT'] is shown as "/home/httpd/vhosts/augustin.it/httpdocs", therefore you need the following in your include path:

1) /home/httpd/vhosts/augustin.it/httpdocs/radicore/includes
2) /home/httpd/vhosts/augustin.it/httpdocs/radicore/menu
3) /home/httpd/vhosts/augustin.it/httpdocs/radicore/audit
4) /home/httpd/vhosts/augustin.it/httpdocs/radicore/workflow

I note on our entry for (1) you have a leading '.' before '/home', which makes the path relative, not absolute.

Note also that you may wish to place the 'includes' directory outside of your web root so that it cannot be accessed from any browser.
