Tony,

In

http://www.tonymarston.net/sample/person_search.php

http://www.tonymarston.net/sample/pers_type_search.php

http://www.tonymarston.net/sample/option_search.php

http://www.tonymarston.net/sample/tree_type_list.php?session_name=sample

After pressing the SUBMIT button all rows are displayed and no search is performed.

Also, in those search screens "required" fields are highlighted with red asterisks, as in ADD1 screens.

Thanks.

I must have copied across some old copies of some files from somewhere but it's all fixed now.

Tony,

This is a different bug but also happens in connection with the search screen.

Now the searched term gets "remembered" and the search result displayed when other things were requested.

For example:

- 1) Go to "Search PERSON" http://www.tonymarston.net/sample/person_search.php
- 2) In the "First Name" field enter "James"
- 3) Press SUBMIT
- 4) In the List PERSON screen only the James Bond record (Id 007) is displayed
- 5) Press RESET
- 6) Ten records are displayed (from PA to SF)
- 7) Press NEXT (that is, click the NEXT link)
- 8) Only the 007 record is displayed, instead of the second set of 10 records.

The same bug can be triggered with PERSON TYPE

- 1) Go to "Search PERSON TYPE" http://www.tonymarston.net/sample/pers_type_search.php
- 2) In the "Id" field enter "ACTOR"
- 3) Press SUBMIT
- 4) The List PERSON TYPE screen displays only the ACTOR record (Id ACTOR)
- 5) Press RESET
- 6) Ten records are displayed
- 7) Press NEXT (that is, click the NEXT link)
- 8) Only the ACTOR record is displayed, instead of the second set of 10 records.

Thanks.

Fixed. I forgot to clear the \$search string after it had been used.
